

THINKS HERMAN BID IS SUSPICIOUSLY LOW

Postmaster General Dubious as to Offer by Contesting Contractor to Print Money Order Blanks.

COULD OBTAIN PROFIT ONLY ON DELIVERIES

John M. Masten Included Among Officials Under Charges—Considering the Christianity Resignation

Postmaster General Payne is slow in letting the contract for printing of money order books, the first large contract considered since the disclosures of fraud in the Postoffice Department. Paul Herman, of New Jersey, is the lowest bidder on the money order books, but Mr. Payne is unwilling to accept the New Jersey man's proposal until it has been thoroughly investigated. Fourth Assistant Postmaster General Bristow will investigate the bids while Mr. Payne is away on his vacation and the contract will not be let until the return of the Postmaster General.

HOUSE OFFICES SITE PROCEEDINGS DELAYED

Instructions to Govern Condemnation Taken Under Advisement.

The consideration of instructions which shall govern the action of the appraisers in determining the value of the different places of property in square 630, selected as a site for a building for committee rooms for the House of Representatives, occupied the attention of the Justices of the Supreme Court of the District yesterday afternoon, sitting in general term.

Suggestions were submitted to the court by District Attorney Beach and A. A. Heehling, Jr., special counsel for the Government. The instructions are practically the same as those issued by the court in the matter of the condemnation of a site for the city postoffice and the condemnation of the land in Rock Creek Park.

Counsel for the owners of property in the square are contending that the fact that their land is to be taken for the use of a great public building should be taken into consideration in determining the value. The loss of their property as business sites should, they contend, be also considered.

After hearing argument on the subject the court took the matter under advisement and will announce its decision on Friday at 10 a. m. At the same time the court will announce the names of the appraisers chosen.

GARBAGE CONTRACT HEARING POSTPONED

Future Date Satisfactory to All Parties to Be Fixed Upon.

The hearing of the complaint of the Washington Fertilizer Company, garbage contractors for the District, which was to have been called tomorrow, has been indefinitely postponed, because of the absence from the city of Col. Myron M. Parker, president of the company. Commissioner West has recommended that the secretary of the Board make arrangements with the fertilizer company for a date that will be mutually satisfactory.

The trouble is between the garbage contractors and Mr. Stutler, Superintendent of Street Cleaning, who some time ago fined the company \$300 for not fulfilling the terms of contract. A complaint was made to the Commissioners who referred the matter to Mr. Stutler. The result was that the Commissioners believed the Superintendent of Street Cleaning had acted properly in the premises. Later the fertilizer company asked for a board hearing, which was granted.

COMMISSIONERS OUT ON TOUR OF INSPECTION

The Commissioners went out early this morning to make inspections in the northwestern part of the District. They drove over the Tenleytown Road, almost to the District line, to see where the \$6,000 available for the improvement of Wisconsin Avenue could best be expended. They then went to Fort Reno and went over the four-room schoolhouse which is being built there and which they found well along.

Then they visited the new police station building at Tenleytown, which is also well advanced. They looked over the fire engine house at Tenleytown, with a view to necessary repairs, and afterwards visited the eight-room schoolhouse which is being erected near the corner of Twenty-four and K Streets. Incidentally they looked at street and parking work done.

GET INCREASE IN PAY.

The agreement between the electrical workers and their employers in Washington expired today. It was thought the men would strike for an increase in their wages from \$4 to \$4.50 per diem, but another satisfactory agreement was reached several days ago and the workmen will get the increase in the fall without a strike.

actual cost of manufacture. This has caused the Postoffice officials to wonder where Herman is to realize any profit. It is presumed he expects to make his money on the delivery of the books, as the department allows the contractors three and one half cents each for sending the books direct to postmasters. On 1,500,000 books this would amount to \$22,500. As the actual cost of delivering this number of books is said to be only \$10,000, it is presumed Herman will content himself with this profit of \$12,500 on the contract.

Inspectors are looking into the charges made against John M. Masten, assistant superintendent of the railway mail service, by a man named Terry. Masten was formerly chief clerk in the office of the First Assistant Postmaster General. Terry was then employed in the dead letter office, but was transferred under Masten's order to the city postoffice. The clerk protested against the change, and alleges that Masten offered to have him transferred to the dead letter office for \$100.

Terry made an affidavit concerning Masten's action, and attempted to deliver it to the First Assistant Postmaster General, but says he was unable to do so on account of Masten's interference. Terry then filed his charges against Masten with the Civil Service Commission.

The resignation of George A. C. Christman, law clerk of the Postoffice Department, is under consideration, but Postmaster General Payne will not take any action on it until he returns from his vacation.

AUTO REGULATIONS NOT UNREASONABLE

Court Overrules Contention in Suit to Restrain Commissioners.

In a decision announced today, Justice Gould upheld the validity and reasonableness of the automobile regulations promulgated by the Commissioners.

The decision was made in connection with the suit of Carl J. Lockwood, a dealer in automobiles, who sought to have the Commissioners restrained from putting the regulations into effect. Justice Gould signed an order dismissing the rule issued against the Commissioners, requiring them to show cause why the regulations should not become operative.

Lockwood, the petitioner, contended that the proposed regulations are unreasonable, on the ground that they discriminate between "mobiles" and vehicles drawn by horses. The court held that there is nothing unreasonable in the proposed regulations, and that the Commissioners have used no arbitrary power in promulgating them.

JUST OUT OF PRISON AND WISHES A BRIDE

Former Pittsburg Professor Notices a Young Woman.

PITTSBURGH, July 15.—Prof. Osbaldeston, formerly of Pittsburg, but who until recently had been an inmate of a German prison for killing a man whom he charged with breaking up his home, has written Miss Day, of this city, where he formerly boarded, that he is coming to Pittsburg to claim her as his wife.

Miss Day notified the German consul that she wanted Osbaldeston arrested when he landed at Philadelphia. She charges him with forging a marriage certificate and claiming her as his wife. She does not want to see him.

BONE DISLOCATED BY FALLING ICE BLOCK

A large block of ice dropped twenty feet from a derelict on a schooner anchored at the foot of Thirty-first Street northwest this morning, struck Robert Johnson, a negro, on the shoulder, and caused a dislocation of the bone. He was removed to the Georgetown University Hospital, where he was also found to have suffered from the shock of the blow.

"DABSTERS"

People Who Do Things by Piecemeal. Many people are convinced coffee is the cause of their sufferings and stop its use from time to time to get relief. During these periods when they are not drinking coffee they feel better. They are getting well in small installments.

How much better it is to stop short on the coffee and shift to well-made Postum and get well once and for all. As soon as this is done the destroying effects of coffee are stopped and a powerful rebuilding agent is set to work. Health comes back by bounds and so long as the right food and drink are used and improper food is left alone the cure is permanent.

A lady of Readfield, Me., says: "I was always a great lover of coffee and drank it so steadily that I would have to stop it at times on account of dizziness in my head, gas in the stomach and other troubles. I would leave off the coffee for a few weeks until I felt better, then would go to drinking it again. I continued this for years and paid dearly for it, until about a year ago I read a Postum Cereal article and bought and carefully prepared some. It filled the place of coffee from the start so far as flavor and taste go, and it has righted my stomach troubles. I have improved so that my friends notice the change. I have exchanged sickness and misery for health and happiness. Through Postum I have got well all at once." Name furnished by Postum Co., Battle Creek, Mich.

Ice cold Postum with a dash of lemon is a delightful "cooler" for warm days. Send for particulars by mail of extension of time on the \$7,500,000 contest for 735 money prizes.

AMERICA COMPLAINS OF GUATEMALAN JUSTICE

Ohioan Now Languishes in Prison at Solola.

APPEALS TO U. S. MINISTER

Frank Brown Tells Pathetic Tale of Hunger and Suffering—Unable to Obtain Trial.

GUATEMALA, June 26.—(Special by Mail).—United States Minister Combes has received a letter written by Frank Brown, an American, formerly of Mansfield, Ohio, who is in prison at Solola on a charge of assault. The letter gives a faint idea of the manner of treating prisoners in this republic.

Brown accidentally shot an Italian, wounding him slightly, some time last September. The Italian was laid up for a month, when he was fully cured. He went to Brown, asking for \$1,500 to pay damages and doctor's bills. Brown, being a poor man, could not pay anything like this amount, and as a result the Italian had him arrested. Upon the arrival of Mr. Combes last February, the American prisoner wrote, complaining of his incarceration without trial.

Unable to Obtain Trial.

The minister has worked on the case since then, but has as yet been unable to obtain a trial for Brown. About a week ago Minister Combes received the following letter, which tells some of the sufferings the American has had to endure:

"Solola, Republic of Guatemala, June 13.

"Mr. Leslie Combes: "Sir: I write you a few lines to let you know concerning my case, hoping you will do what you can to procure my liberty. I have been in prison ten months now and they have done nothing at all in my case. Fifteen or twenty days ago they called me into court and informed me they could not find my accuser. They sent five dispatches for him and he did not answer. "The judge here told me he would give me my liberty, unless my case came up from Quezaltenango, but when it came yesterday, he told me the court said to examine me another time—in other words to commence my case all over again.

Filthy and in Want.

"I am here in prison without clothing. I have no shoes. I get about half enough to eat. I sleep on the stone floor. I have one thin blanket, and it is a whole lot colder here than in Guatemala. I am so hungry sometimes that I eat banana and orange peels to satisfy my hunger. My clothing is filthy with vermin, and on the whole I am miserable.

"Therefore I implore you, for God's sake, to procure my liberty. If you can give me justice, get my trial. Wishing you and yours peace and happiness, I remain yours ever,

"FRANK BROWN."

COURT RECORD.

Equity Court No. 1—Justice Anderson—Duckett vs. Hudson et al.; order setting aside decrees and orders of June 5, 1932 and July 7, 1932. Slye vs. Slye; order staying hearing on answer to rule, until July 25. Newton vs. McLean; order directing William H. Roberts, trustee, to make payments. Millan vs. Lansburgh; restraining order returnable July 24.

Bankruptcy Court—Justice Anderson—in re Frank G. Nolte; order confirming composition and order for distribution. Equity Court No. 2—Justice Gould—Simcox vs. Simcox; prayer of bill denied. Hollinger vs. Hollinger; do. Bacon vs. Hunt; decree for sale amended. Taylor vs. Bateman; rule upon E. May day charged and referred to auditor. Lockwood vs. District of Columbia; rule as to injunction discharged and injunction denied (two cases). Davis vs. Davis; depositions of non-resident witnesses ordered under commission.

Criminal Court No. 1—Justice Pritchard—United States vs. Constant L. Jones; housebreaking and larceny, order for discharge from jail. United States vs. Benjamin G. Hill; murder; mandate of Court of Appeals filed and warrant of execution ordered. Probate Court—Justice Anderson—Estate of Richard C. Goode; will admitted to probate and letters testamentary granted. Estate of Thomas Beck; account passed. Estate of Titian J. Coffey; account passed. Estate of Lucy L. Elliott; will admitted to probate and letters testamentary granted to John S. Elliott. Estate of Catharine C. Egan; order to pay funeral expenses. Estate of Annie J. Marshall; order of publication. Estate of George S. Parker; proof of publication. Estate of Sophie Herman; account passed. In re Margaret F. Baumer; account passed. Estate of Henry A. Lockwood; will partly proved. Estate of Moses Lacy; inventory filed. Estate of Emma G. Proctor; order for publication. Estate of Robert C. Griffin; petition for probate of will filed. Estate of Clyde W. Dawson; petition for letters of administration filed. Estate of Francis A. Lutz; inventory filed. In re Florence C. Chapman; order to inventory real estate. Estate of Horace Palms; will partly proved.

APPLY TO THE POLICE.

The Commissioners are in receipt of a letter from Albert G. Hall, complaining of tent meetings being held on the vacant lot at the corner of Riggs Place and New Hampshire Avenue northwest. Commissioner West has recommended that the writer be informed that the permit granted by the owner of the property for the meetings has been revoked. Mr. Hall's only relief now is to appeal to the Police Department.

TRUNK BROKEN OPEN.

Henry Barrister, of 801 Dixon's Court southwest, reported to the police that a trunk in his room had been forced open within the past twenty-four hours and a small amount of money taken. An investigation will be made.

CASTORIA For Infants and Children.

The Kind You Have Always Bought

YELLOW FEVER TRACED TO BITE BY MOSQUITO

Official Report of American Working Party Sent to Vera Cruz Confirms This Theory.

The report of the working party appointed from the Public Health and Marine Hospital Service for the purpose of making a special study of the transmission of disease by mosquitoes was made public today at the Treasury Department.

The conclusions of the party are: The stegomyia fasciata (the mosquito), when contaminated by feeding on a case of yellow fever forty-one and a half hours after the onset of the disease and subsequently fed on sugar and water for twenty-two days, one and a half hours, can, when permitted to feed on a non-immune individual, produce a severe attack of the disease.

That the mosquito, so fed, presents regularly a parasite not presented when fed either on blood from a case of malarial fever or on normal blood. But the working party does not identify this parasite (the Myxococcidium stegomyiae) as the germ of yellow fever.

Vera Cruz was selected as quarters for the party which was chosen to make the investigations in behalf of science and the public health of the United States. In compliance with bureau orders of April 25, 1932, a party consisting of Assistant Surgeon Herman B. Parker and Acting Assistant Surgeons George E. Byer and O. L. Pothier, working in conjunction with the Yellow Fever Institute, went to Vera Cruz and started the study of yellow fever and diseases common to Mexico and the United States.

The work terminated about the end of October, last year, since which time the party has been studying the material brought to this country and collaborating the notes made in Mexico.

Dr. Byer, who is mentioned as an assistant surgeon, is the professor of biology at Tulane University of Louisiana, and Dr. Pothier is the pathologist to the Charity Hospital, New Orleans.

In order to demonstrate the transmission of yellow fever by the mosquito, to study the changes that are present in the tissues of the mosquito, and to study the changes in the blood of the subject, it was decided to attempt the inoculation of an individual. A room was made sufficiently mosquito proof and a man brought from Jalapa, a town of 4,500 feet altitude, and free from yellow fever. The Mexican government appointed a commission to act with the working party, and the members concur in the conclusions.

The first experiment was on a man who had been a prisoner in one of the jails for twenty-two months. He was taken to Vera Cruz with his full consent and permission, and placed in the mosquito-proof room for observation and experimentation. The tests resulting in the conclusions quoted were tried on the subject.

A second subject, also a native of Jalapa, was inoculated with the blood serum from the vein of the first subject. The temperature of the second subject was taken every twenty-four hours for the next six days without variation from the normal. This experiment was then considered negative.

TRUE REFORMERS' HALL FORMALLY DEDICATED

With Fitting Ceremonies the New Building Is Opened.

The True Reformers of Washington, together with delegates from many other cities, today dedicated their new hall at the corner of U and Twelfth Streets. The exercises began this morning at 10:30 o'clock, when F. W. Dixon, secretary of the local executive committee called the meeting to order.

Minnie A. Lucas read letters of regret from out-of-town chapters of the True Reform Union congratulating the Washington order upon the successful completion of their new building. J. A. Lanford, architect, then surrendered the keys of the building to the president, the Rev. W. L. Taylor, D. D. He gave a detailed account of the building.

The exercises were continued this afternoon at 2:30, when a letter of congratulation and good wishes from President Roosevelt was read and Commissioner Macfarland delivered an address of welcome to the out-of-town Reformers upon the extent and influence of the union.

The exercises closed with an address by the Hon. J. C. Daney, Recorder of Deeds, and a benediction by the Rev. James H. Lee.

ONE HORSE PERISHES IN STABLE FIRE

One horse perished and several were saved in a fire that damaged the stable of Isaac Ottenburg, back of 1816 Fifth Street northwest, early this morning. The flames spread to a shed adjoining and completely destroyed the small structure. The total damage is estimated at \$400.

The fire was discovered on the lower floor of the stable shortly after 3 o'clock. An alarm was turned in, and the building's engines arrived and quickly extinguished the fire. The firemen experienced some difficulty in leading the frightened horses from the burning stable.

NEWS FROM ROCKVILLE.

ROCKVILLE, Md., July 15.—The board of directors of the Montgomery County Agricultural Society met here yesterday and made the usual arrangements for the coming exhibition to be held at the fair grounds here on August 18, 19, 20, and 21 next. This year the society has new buildings, a half mile racetrack, grounds covering about twenty-five acres of land, mostly in shade trees, and other new features. The meeting yesterday was for the purpose of appointing the judges more than for any other purpose. The following persons will judge the exhibits:

Horses—quick draft, hackney, coach, and standard bred—C. P. Smith, of Hagerstown, Md.; thoroughbred horses—F. Hall, Halls, Md.; registered heavy draft and teams—H. B. Witter, and P. M. Hiteshaw, both of Frederick, Md.; poultry—A. E. Warner and J. W. Bruhart, both of Baltimore, Md.; farm products—James T. Henderson, of Sandy Springs, Md.; garden products—Miss Eliza Brooke and Miss Ellen Farquar, both of Sandy Spring, Md.; flowers—Mrs. William B. Mobley, of Laytonville, and Mrs. P. D. Laird, of Rockville, Md.; fruits—J. T. Kelley, of Darnestown, Md.; flour—James T. Henderson, of Sandy Spring, Md.; dairy—James F. Oyster, of Washington, D.C.; culinary department—Mrs. William Dorsey, of Rockville, and Mrs. Alexander Gassaway, of Darnestown; children's department—Mary Bentley Thomas, of Ednor, Md.; vehicles—E. D. Hawkins, of Olney, Md., and George W. Caswell, of Unity. This year the amount of purses and premiums offered by the society will exceed \$10,000.

THE HUB FURNITURE CO.,

Southeast Cor. Seventh and D Streets N. W.

INFANT DEATHS FEWER THAN IN PAST WEEK

Marked Decrease in Mortality Rate.

COWS' MILK IS DANGEROUS

Nursing Bottles With Long Tubes Condemned as Unsanitary by the Health Officers.

The number of deaths of infants under two years of age from diarrheal diseases during the week just ended was only eighteen, a decrease of fourteen compared with the preceding week.

As has been uniformly shown in the recent investigations which have been made by the Health Department relative to the diet of infants dying from such diseases, a large majority were on a diet of cows' milk in some form when they were taken sick.

Fifteen of the eighteen decedents who died during the past week were fed on a diet of this character prior to the onset of their illness.

Ten were fed on cows' milk supposed to be fresh and clean, and five were fed on condensed milk of various brands.

Nursing Bottles.

An effort seems generally to have been made to care properly for nursing bottles and nipples. In one instance, however, the attending physician is said to have expressed the opinion that carelessness on the part of the nurse with reference to these articles was probably associated with the infant's sickness and death. In another case a nipple with a long rubber tube was used.

Nipples of this character are regarded as exceedingly dangerous, in view of the practical impossibility of cleaning the tube through which the milk passes. In fact, the sale of such nipples was some time ago prohibited by an ordinance in one large American city.

One of the deaths during the past week occurred on a baby farm. The proprietress had two infants in her care at the time of the investigation, but stated that at one time she had had as many as seven. The premises on which these infants are cared for are far below the level of the street, damp, and may be regarded as generally unsanitary.

Weekly Death Record.

There was a decline of more than 30 per cent in the number of deaths during the past week as compared with that of the week previous. The deaths numbered 125, as against 157 by the last report and 145 in the corresponding period of last year. The death rates ranged accordingly 22.9 last week, 25.8 last year and 28.8 in the former week. The principal cause of death which showed an appreciable decline were those of the brain and nervous system which fell from 17 to 14, affections of the heart from 16 to 5, and diarrhoeal diseases from 34 to 25.

Of the latter 18 were infants under one year old, 10 being white and 8 colored. There were 3 fatal cases of typhoid fever, 3 of whooping cough, and 2 of cerebral meningitis. The large number of deaths due to external causes as shown by the last two reports was again repeated this week. There were 9 of these of which 3 were by suicide, 1 homicide, 1 traumatic tetanus, 1 drowning, 1 by leaping from window in delirium, and 2 heat stroke.

Births numbering 56 were reported, of which 54 were white and 2 colored; males 41 and females 45.

The past week was marked by a very considerable rise in the number of reported cases of typhoid fever. During the preceding week the total number reported was 17. During the week just ended it was 41. The number of cases of typhoid fever under treatment at the beginning of the past week was 52. At its close this number had increased to 120.

Of scarlet fever there were 5 cases in quarantine at the beginning of the week. But 1 new case was reported, and 2 being discharged left 4 cases in isolation in as many premises.

GOMPERS TO ORGANIZE PLANT OF D. N. PARRY

Attitude Toward Union Labor Resented by Leaders.

INDIANAPOLIS, Ind., July 15.—An organized effort will shortly be made by the American Federation of Labor to organize the plant of D. M. Parry, president of the National Manufacturers' Association. It is understood that Mr. Parry's attitude toward labor organizations has made the chief officials of the Federation active against him, and efforts will be made to form a union in his establishment as a matter of retaliation.

Great secrecy is maintained concerning the matter, but it is said that President Gompers has already issued an order to that effect, and that organizers are already carrying the war into the enemy's camp.

D. M. Parry, when asked about the report, said: "You can just say that when this plant becomes a union institution, Indianapolis will lose it, spot and branch. You understand my meaning thoroughly, do you? Before this establishment is operated under the domination of unions it will be shut up tight and will be kept shut."

BURGULARS FOILED.

Porch climbers tried to enter the residence of Captain Blake, at 1517 P Street northwest, early this morning, but failed to effect an entrance to the house. A window had been opened, and there was every indication that the burglars had attempted to commit a robbery, but were evidently frightened off.

THREE ROUTES TO CONSUMPTION

There are three roads which lead from health to consumption. Over one of these roads pass all that great multitude of people—a sad, mournful procession—who die every year of consumption. Each route begins with health and happiness and ends with disease and death.

FIRST ROAD:

A slight cold, neglected, settles in the head or throat—chronic catarrh—extends to the lungs—consumption—death.

SECOND ROAD:

A slight cold—neglected cough—chronic bronchitis—settles in the lungs—gradually grows worse—consumption—death.

THIRD ROAD:

A cold neglected—settles in the throat—hoarseness—short breath—chronic asthma—consumption—death.

Thousands have just started on one of these roads—thousands are half way to the fatal end of one of these roads who are still curable by the wonderful and beneficial power of the Koch Tuberculin. By means of the Koch Tuberculin the deadly bacilli that destroy the lung tissues and lung cells are speedily killed—the supporting parts are healed up, and the straggly, poisonous mucous is cleared from the nose, throat, and lungs, while renewed strength, health, and a permanent cure follow this treatment.

The Koch lymph is vaporized and readily breathed through all the air passages of the nose and throat, directly into the deepest recesses of the lungs—cleansing, purifying, healing, and curing the inflamed tissues.

Upward of nine hundred people are daily taking this treatment at the Koch Institutes in Washington, New York, Buffalo, Newark, Philadelphia, Boston, Baltimore, Chicago, Cleveland, Rochester, Pittsburg, Cincinnati, Erie, and Altoona.

The only Washington office of the original Koch Lung Cure is at 730 15th Street N. W., where skilled resident physicians in lung diseases will examine you and give one treatment free. Home treatment especially prepared for those who cannot call. Write for descriptive pamphlet.

SPECIAL NOTICES.

THE LAWN PETE to be held by Camp No. 2, P. O. S. of A., will be postponed on account of a misunderstanding in date, and all tickets will be good on July 29 and 30. It
